DETAILED ACTION

Reissue Applications

1. The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. Applicant copied the declaration from parent application 09/213,876. The errors described therein are relevant to the parent application only and not to the present application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

2. Claims 36-48 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

3. The assignee listed on the assent of assignee, filed December 13, 1998, differs from the assignee identified on the certificate under 37 C.F.R. 3.73(b), filed February 29, 2000. It is required that applicant clarify the actual assignee and that the assignee listed on the assent correspond to that listed on the certificate under 37 C.F.R. 3.73(b).

4. Claims 36-46 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d

Art Unit: 1734

1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In US Patent Application 08/247,003 (US Patent 5,584,962), applicant surrendered subject matter during prosecution of the application in order to overcome a rejection. This surrendered subject matter includes: a pretensioning means including a tensioning cap affixed to the cores the caps having an end plate engaging the end of the associated core and the plate with securement means engagable in the mounting means and further including biasing means for applying a predetermined force biasing the end plate into engagement with the end of the roll core. Newly added claim 36 does not include the limitations which applicant presented in application 08/247,003 to overcome the prior art of record. Thus applicant is attempting to recapture subject matter that was surrendered in application 08/247,003. See MPEP 1412.02 – examples A-C.

5. The amendments filed December 20, 2000 and May 16, 2001 propose amendments to claims 36-48 that do not comply with 37 CFR 1.173(c), which sets forth

Art Unit: 1734

the manner of making amendments in reissue applications. In particular, applicant has failed to provide an explanation of the support in the disclosure of the patent for the changes made to the claims. A supplemental paper correctly amending the reissue application is required.

6. Accordingly, this action is made non-final.
